PROFESSIONAL SUMMARY

As a college student studying computer engineering, I bring a unique combination of technical skills and hands-on experience to the table. With a background in machine, machine maintenance, and IT, I have honed my ability to troubleshoot and repair complex systems. I am eager to apply my technical knowledge and practical experience to new challenges in the field of computer engineering.

SKILLS

- Problem-solving
- Organizational
- Time management
- Programming
- Adaptability
- Driven

EDUCATION

Computer Engineering - Bachelor of Science - 2025

University of Maine - Orono, ME

Pre-Engineering - Associate of Applied Science - 2022

Southern Maine Community College - South Portland, ME

WORK HISTORY

Maintenance Technician - February, 2018 to Present

Fit-Tech - Gorham, Maine

- Performed preventative maintenance, repairs, and overhauls on a variety of mechanical, and electrical systems.
- Troubleshoot and resolved technical issues, utilizing schematics, diagrams, and test equipment.

IT Technician - May, 2022 to August, 2022

L.L. Bean - Freeport, Maine

- Installed, configured, and maintained hardware and software for computer systems, including desktops, laptops, servers, and printers.
- Troubleshoot and resolved technical issues, including hardware and software problems, network connectivity, and security.
- Collaborated with other IT team members to evaluate and implement new technologies to improve system performance and efficiency.

Mechanical Assembler - May, 2019 to July, 2020

D & G Machine Products Inc. - Westbrook, ME

- Assembled various mechanical and electrical components to produce finished products, following blueprints and production specifications.
- Maintained a high level of quality control, performing routine inspections and tests to ensure product conformance to standards.
- Participated in continuous improvement initiatives, providing suggestions for process improvements.
- Trained new employees on assembly procedures and techniques.

Shop Assistant - May, 2017 to August, 2017

Plas-Tech Inc. - Gorham, ME

- Assisted in the operation of CNC and manual machinery, including lathes, mills, and drills, to produce precision parts and components.
- Assisted with the maintenance and repair of production equipment, including troubleshooting mechanical issues.
